

**CITY OF MOOSE JAW  
ANSWER TO ENQUIRY**

**DATE:** August 2, 2019

**File No. 400-3**

**TO:** City Council

**FROM:** Department of Engineering Services

**SUBJECT: Answer to Verbal Enquiry – 1100 Block of 4th Avenue NE Paving and Widening**

---

At the regular meeting of City Council held on June 24, 2019, Councillor Swanson asked a verbal enquiry regarding paving of the 1100 block of 4<sup>th</sup> Avenue NE and if widening had been considered.

Council considered the matter of narrow roads at the April 17, 2017 Executive Committee. A trial area for one sided parking was implemented in the north central area near SK Polytechnic.

The width used to establish one sided parking was 9.0 meters.

The narrow roads are a trial (in north central area) so there is no existing policy to apply and the approach (in the trial) was to implement one sided parking. It also appears that the width of 4<sup>th</sup> Ave NE would not meet the criteria of 9 meters.

**APPROVAL**
